

Welcome to the Focusrite Plug-in Collective

So far, the Focusrite Plug-in Collective have partnered with top plug-in developers including SoundRadix, Eventide and Positive Grid to provide registered Focusrite customers with great plug-ins, and a new offer will be in their accounts every month.

Free BIAS FX LE and BIAS Amp LE with reverb

We're bringing back popular Positive Grid plug-ins BIAS FX LE and BIAS Amp LE for our registered hardware customers, now with reverb! The Plug-in Collective offer runs from 8 December 2017 right up until 1 February 2018, which should give you plenty of time to register gear, if you haven't already.

Six pedals, three amps and three presets come with BIAS FX LE, a partnership between Positive Grid and Focusrite that offers a free version of the BIAS FX guitar effects processor. BIAS Amp LE, however, gives you a taste of the full-blown BIAS Amp Pro amp modeller – one of the most popular and best-sounding guitar amp plug-ins in the industry. The new built-in reverb provides four classic reverb modes including room, chamber, hall and modulated plate reverb.

If you're looking for an amazing guitar tone to help build your signature sound, don't miss this chance to get the free plug-ins by registering our hardware. Below is a list of everything that comes with BIAS FX LE and BIAS Amp LE.

BIAS FX LE features

Pedals

- Treble Booster (Boost)
- 8080D (Drive)
- EQ6 (EQ)
- Chorus (Mod)
- Delay (Delay)
- Digital Reverb (Reverb)
